

Webinar on COVID-19 Vaccination

[Webinar on COVID-19 Vaccination.](#)

Interview of Dr Raphael Louis

Q1) Briefly explain about your research expertise

A: As a Certified Global Healthcare Reform Expert through OnFrontiers, whereas a Knowledge Network of International Development experts and professionals, my primary area of focus is to collaborating with governments and civil societies to build better healthcare systems, putting the health and well-being of populations at the core center of public health policy. My most current research is based on Cannabidiol (CBD), which been touted for a wide variety of health issues, but the strongest scientific evidence is for its effectiveness in treating some of the cruelest childhood epilepsy syndromes, such as Dravet syndrome and Lennox-Gastaut syndrome (LGS), which typically don't respond to antiseizure medications. In numerous studies, Cannabidiol (CBD) was able to reduce the number of seizures, and in some cases, reduce chronic pain, anxiety relief, anti-seizure, neuroprotective, and cancer treatment. I have also launched a Legislative project through the Government of Canada, to amend the regulation of CBD and classify CBD as a natural health product..

Q2) Let us know about your last five publications and last three conferences attended

A: My last five (5) publications are as follow. Most of them of course focussing on different related topics, within the scope of healthcare and public health, however with the same goals to achieve the best socioeconomic and public health standards to improve and save lives and raising living standards. 1. "A new economic order for global prosperity" - ARMG Publishing: DOI: 10.21272/sec.1(2).52-59.2017. ARMG Publishing is an inter-institutional center of Sumy State University headed by Doctor of Economics, Professor Tetyana Vasilyeva. Honorary Publishing Director Jason Powell, Professor, PhD, Staffordshire University, UK. The Journal of "Socioeconomic Challenges" promotes the development of scientific cooperation and international dissemination of theoretical and empirical research and the best practices in the world to ensure the stability of social and economic processes in the context of globalization and democratization greening, digitalization of social relations. 2. "What Leaders Should Know about E-Government" ARMG Publishing DOI: 10.21272/sec.1(3).73-78.2017. ARMG Publishing is a interinstitutional center of Sumy State University headed by Doctor of Economics, Professor Tetyana Vasilyeva. Honorary Publishing Director Jason Powell, Professor, PhD, Staffordshire University, UK. The Journal of "SocioEconomic Challenges" promotes the development of scientific cooperation and international dissemination of theoretical and empirical research and the best practices in the world to ensure the stability of social and economic processes in the context of globalization and democratization greening, digitalization of social relations. 3. "An Interfaith Dialogue for Peace and Security" LAP Lambert Academic Publishing (2016-02-25) – (ISBN-13: 978-3-659-83408-0, ISBN-10: 3659834084, EAN: 9783659834080), is a milestone in interfaith research and teaching. It brings acceptance and more in-depth understanding of various religious, spiritual and philosophical beliefs. My hope is that we can promote respect and tolerance towards people of differing religious and philosophical views and practices. This publication also serves as a reference material for doctoral student, professors, scholars, academic institutions, teachers; and anyone interested in furthering understanding of world religions. Annually, more than 5,000,000 theses are written worldwide in the research industry. In addition to this are the numerous research notes, articles, and the many creative concepts of professors, universities, and institutions. Enterprises and scientists would be especially interested in these ideas; nevertheless, up to today, most of this work is shelved as a result of high costs. LAP specializes in the publication of such works and uses commitment and the latest technology in order to make the invaluable work of such researchers available worldwide, quickly and efficiently. 4. e-2450 (Health) Petition to the House of

Commons in Parliament assembled (February 27, 2020. Cannabidiol (CBD) is a compound that is found in varieties of the cannabis plant, including industrial hemp plants. While it is non-intoxicating, CBD does have an effect on the body and brain. CBD is a controlled substance under a United Nations drug control convention to which Canada is a signatory. CBD is regulated in Canada under the Cannabis Act and its regulations, as well as the Food and Drugs Act and its regulations. 5. The National Coalition Party of Canada (NCPC) - (BN) 700869878RC0001 Canada Not-for-profit Corporations Act - 2020-11-09). The National Coalition Party of Canada (NCPC) is a non-partisan Political Action Committee (PAC) organization, whose purpose is to promote visible minorities rights under human rights laws, to foster international peace and diplomatic relations, the creation and dissemination of rigorous political advocacy, for the protection of civil rights under The Canadian Charter of Rights and Freedoms, to protect those basic rights and freedoms of all Canadians. Articles of Incorporation - Canada Not-for-profit Corporations Act (NFP Act). Regarding my last three conferences attended, I was very fortunate and honored to have been selected by Longdom Webinar Conferences on Covid-19 Vaccination and Research. I had the opportunity to deliver several oral presentations, however the last 3 areas follow: 2a. The Importance of Biochemistry in Public Health (Longdom Webinar Conferences) 2b. Clinical Biochemistry Characteristics of COVID-19 (Longdom Webinar Conferences) 3b. How the Scientific community can support our confidence in vaccine research and testing? (Longdom Webinar Conferences). COVID-19 is a platform for, (Doctors, physicians, research scholars, students, and business, pharma professionals) to expose their research work, to Share their knowledge in COVID-19 Vaccination. It is an occasion to interact with associates across the globe focused on learning about COVID-19 Vaccines and current research and development status. World prominent speakers, the most recent therapies and the recent modernize in COVID-19 Vaccines are trademarks of this webinar. Major scientific sessions of COVID-19 Webinar are COVID-19, COVID-19 and Impact on Healthcare, Infection Control Procedures, Vaccine Research & Development, COVID-19 case reports and clinical trials, COVID-19 risk factors and prevention and this Webinar attracts leading researches and decision makers in their field, principal investigators, and business professionals for sharing knowledge and research globally..

Q3) Has COVID-19 affected your research work while working on your current project? If yes, then how will you overcome it?

A: As per the escalating report of growing number of cases, COVID-19 has so far reached about 4.5 million worldwide, I do believe that an international virtual conference can explore how science, technology, and innovation can respond to the global pandemic. I firmly and fundamentally believe that the world's scientific capacity to get through the COVID pandemic health and economic challenges will depend on how the scientific communities apply the principles of international cooperation to expand and strengthen global partnership building. COVID-19 is a huge stress and it is a challenging test to all of our systems at various or at almost all levels, however, it is also imperative to identify and highlight new scientific opportunities, and new economic trends that may have been somewhat incipient, stagnant, or perhaps overlooked under the radar..

Q4) What measures are you taking and challenges being faced to get rid of the current COVID-19 pandemic?

A: Longdom Conferences COVID-19 is a platform for Doctors, physicians, research scholars, students, businesses, pharma professionals and many more, to expose their research work, and share their knowledge in COVID-19 Vaccination. It is also an occasion and opportunity to interact with associates across the globe focused on learning about COVID-19 Vaccines and current research and development status. World prominent speakers, the most recent therapies and the recent modernize in COVID-19 Vaccines are trademarks of this webinar. Major scientific sessions of COVID-19 Webinar are COVID-19, COVID-19 and Impact on Healthcare, Infection Control Procedures, Vaccine Research & Development, COVID-19 case reports and clinical trials, COVID-19 risk factors and prevention. Longdom Conferences COVID-19 Webinar (Scientific Program) attracts world's leading researchers, field experts, and

influential decision makers in their respective industries, and business professionals where we can share knowledge and research at a global level. I am fully engaged in the webinar events, which help to developing insightful understanding on the challenges and solutions ahead..

Q5) Were you provided with relevant “information for participation” regarding conference and related issues?

A: Yes! Undoubtedly. I was fascinated and ecstatic by the Longdom Conferences Webinar Platform, and the swiftness response to organize and put together such resourceful platform of experts and professionals, caring for human lives, gathering in knowledge sharing dialogue for the betterment of humanity. In any given humanitarian crisis, including pandemic crises, a sustainable and knowledgeable dialogue is the first effective step towards tangible long term and sustainable solutions. Thus, as noted, Longdom conferences coined as ‘father of all conferences’ has an history of leading international speaker talks and is instrumental in bringing together experts and beginners for friendly and effective research-oriented discussions. Longdom Conferences bring together scientists at every level from different disciplines to understand and discuss during programmed topic sessions and informal gatherings. Longdom Conferences showcase innovative, cutting-edge research on the fundamental roles in addressing the challenges and translational research from academia to industry. All these opportunities support professional growth of younger scientists and promote future collaborations to enhance participation and contribution to their exciting research work..

Q6) When are you planning to attend physical conferences in 2021 and what would be your preferred destination?

A: I would love to attend the physical Longdom Conferences in Rome Italy and Dubai UAE and would love to finally with the Longdom Conferences team and colleagues and organizers. That is definitely on my wish list. .

Q7) How do you feel about translating your current research into innovation or spin-outs?

A: Being certified by the Government of Canada - Health Canada Drug and Medical Device Small Business Status (DMDSBA) - Issuing authority Health Canada; also having the opportunity to collaborate with Science and Innovation Canada, greatly motivate me continue to work and conduct extensive Research Review and Social Experiment, including Public Opinion Research (POR), because in order to shape public policy in the field of healthcare service delivery, especially policies that affect lives and living standards, I fundamentally believe that the public also plays a vital and crucial role in such process, which help to provide advice on, or introduce new innovative solutions, new technologies, new research and development investment, leading to cutting edge healthcare system and healthier populations..

Q8) What are your suggestions to the scholars who are finding their paths in your research field?

A: The greater the challenge, the greater the opportunity, believe in yourself and follow your destiny and most importantly love what you do..

Q9) What do you find the difference in physical and virtual conference in collaboration with the other global experts?

A: As the matter of fact, I love and appreciate the modern day or 21st century technological advancements, innovations and breakthrough, especially in the fields of nanotechnology, biotechnology, electronic medical records, blockchain systems, telemedicine, and artificial intelligence, to name a few. These scientific innovations and breakthroughs allow humanity to operate in a virtual world, and also provide a myriad of other benefits. What am I missing the most regarding physical conferences is the human touch, the person to person connection, the face to face interaction and the professional exchanges. I miss that aspect very much, in particular, the social networking experience..

Q10) How would your research contribute to human prosperity?

A: My publication Abstract entitled: "A new economic order for global prosperity" sets out my entire vision of a better world. The New International Economic Order (NIEO) was a set of proposals put forward during the 1970s by some developing countries through the United Nations Conference on Trade and Development to promote their interests by improving their terms of trade, increasing development assistance, developed country tariff reductions, and other means. It was meant to be a revision of the international economic system in favor of the Third World countries, replacing the Bretton Woods system, which had benefited the leading states that had created it. The term was derived from the Declaration for the Establishment of a New International Economic Order, adopted by the United Nations General Assembly in 1974, and referred to a wide range of trade, financial, commodity, and debt-related issues (1 May 1974, A/RES/S-6/3201). This followed an agenda for discussions between industrial and developing countries, focusing on restructuring of the world's economy to permit greater participation by and benefits to developing countries (also known as the "North-South Dialogue"). THANK YOU .
